Wireless Weather Station

A highly advanced weather station with an unbeatable range of features to keep you fully updated on current and future atmospheric activity. The outdoor sensors are simple to install and will wirelessly transmit data to the base station which interprets and displays the data on the touch screen panel. You can also connect the base station to your PC through USB and upload all recorded weather data for more in-depth analysis.

XC0348

\$149

Wireless Weather Station

A feature-packed weather station for the enthusiast forecaster. The outdoor sensors will monitor up to 10 key weather parameters and will transmit up to 150 metres to the indoor base station to keep you updated on current and future weather conditions. This station will measure indoor/outdoor temperature, relative humidity, rain, wind speed, wind chill, dew point, barometric pressure and also displays the date and time. XC0346
